Summary

I am a software engineer with 3 years of professional work experience. I build web applications, web services and application programming interfaces that are secure, optimal and meet their demands.

With a primary Focus on web application and API development, I have built and maintained digital fintech and edtech solutions and products that are currently in use (Social Lender, E - LMS and bincomDevCenter app), I have also worked as a freelance developer on cross-platform mobile application projects, and web application projects.

I am a graduate of Computer science and information technology.

Over the years, the academic knowledge and work experience I have gained has helped improve my efficiency in the development of user-centric web and mobile applications mainly using PHP(Laravel, slim and Yii frameworks) JavaScript (Node and express frameworks) and flutter with Dart.

Links to my GitHub repository and LinkedIn profile can be found below.
